

Aerotech is a private company operating in the field of aerospace and defense for more than 20 years. Our team includes over 25 experienced employees work.

By taste of the challenge and to optimise our new machine park, we are opening our doors to other national and international industrial market.

Aerotech expertise has been growing on small and medium production series, prototype etc... Since 2006, we are certified EN9100 and ISO 9001. Aerotech is also a part of Space aero™.

Aerotech's high quality system permits us to be among of the best mechanical and components providers.

We manufacture hard metal parts such as stainless, steel, carburized steels, titanium, but also, plastics, PEEK and PVC.

Aerotech is specialized in manufacturing head body and pilot's seat belt buckle.

Our values and politics:

The customer satisfaction, the product quality and timeliness are central to our priorities.

Our services:

- We have developed strong bonds with excellent providers and subcontractors network
- In Aerotech, a room is completely dedicated to the assembly of mechanical parts
- The company manages all the deliveries.

Company's machinery:

- 5 axis Milling: 4 engines including 2 of them with a robotic arm
- Horizontal Milling : 10 engines
- Vertical Milling: 3 engines
- Lathe Turning: 4 engines.
